## Gallstones: Understanding the Cause and Treatments

The function of the gallbladder is to store bile. Bile is a digestive liquid continually secreted by the liver. Sometimes the substances contained in bile crystallize in the gallbladder forming gallstones. If a stone becomes lodged in the bile duct, surgery might be needed. Attend this informative lecture to learn about your gallbladder and a new single incision laparoscopic surgery to treat gallstones.

**Thursday, May 20 • 6–7:15 pm**  
**West Medical Center, Main Conference Room**

**Meet Our Presenter: Daniel Borison, MD**

Willoughby Office:  
36060 Euclid Avenue, Suite 107  
Willoughby, Ohio 44094  
440-684-0000

Mayfield Heights Office:  
6770 Mayfield Rd., Suite 320  
Mayfield Hts., OH 44124  
440-684-0000

Dr. Borison earned his medical degree from New York University. His special medical interests include breast care, colon-rectal problems, and laparoscopic surgery.
