

### **Lake to begin smoke testing sewer system**

Lake County Utilities Department will begin smoke testing the sanitary sewer system has begun in Grand River Village, weather permitting, and will continue for about 30 days.

Smoke testing consists of blowing harmless, odorless smoke into the sanitary sewer system to locate damaged pipes, improper connections and show areas where unwanted storm water enters the system.

Flyers will be delivered to each building before testing their particular street.

Residents in these areas with questions about smoke testing may call 440-350-2652.
