

Mondo Polymer Technologies, Inc. is a primary partner with the Ohio Clean Marinas initiative in promoting shrink-wrap recycling associated with seasonal boat storage and protection. The Ohio Clean Marinas Program is a proactive partnership designed to encourage marinas and boaters to use simple, innovative solutions to keep Ohio's coastal and inland waterway resources clean. The Program assists these operators in protecting the resources that provide their livelihood - clean water and fresh air.

The basic goal of the Program is environmental stewardship by making marinas and boaters more aware of environmental laws, rules and jurisdictions, and to get as many marinas as possible to follow best management practices and to be designated as "Clean Marinas."

Understanding the boat shrink wrap recycling program

Keep this program active

In an effort to keep this program moving forward, we ask that all boat owners and or marinas remove all nylon strapping, carpet, metal and lumber from all boat wrap covers, these materials are not recyclable by Mondo at this time. We also ask that effort is taken to keep the boat wrap as clean as possible. If you have any questions about your material please feel free to contact Ron Wesel.

Millions of pounds of boat shrink-wrap are used each year in Ohio alone; if it is not recycled it will end up in a local land fill.

Land fills are filling up across the country and this is an economical as well as simple way to help this problem.

For this material to be recycled, it will need to be free of contaminants such as metal, carpet, lumber, and nylon strapping, which may have been used to secure the wrap to the vessel.

Mondo Polymer with help from local boating associations, have developed a program that will keep this wrap from hitting the land fill. In an effort to keep this program active we are asking that the before mentioned contaminants be removed before pickup.

We have learned over the last three years that the costs associated with recycling this wrap are far too great without the help of boaters and marinas removing the contaminants and strapping.

It's up to you....

If you would like to help with the ever growing problem of overflowing land fills please consider recycling your boat shrink wrap.

For more information please visit Mondo Polymer on the web at mondopolymer.com or give us a call at 888.607.4790
