Happy Friday!
Nothing like a wildlife conservation video about parachuting beavers to ring in the weekend! The parachuting beavers are from 7-9 minutes in.

<http://www.npr.org/.../watch-long-lost-parachuting-beaver-footage>

WATCH: Long-Lost Parachuting Beaver Footage From 1950
Circus 1950, Idaho Fish and Game tried a new way to handle beaver overpopulation: relocate some by dropping them from planes. A film was made.

Would you like to see more native wildflowers along roadsides. Instead of invasive weeds?

"This is a missed opportunity. By applying ecological design consciously to roadsides, we could be driving through uniquely picturesque and ecologically important native ecosystems."

Roadsides done 'right' are an ecological win
When the Highway Beautification Act was signed by President Lyndon B. Johnson 50 years ago, on Oct. 22, 1965, it was a bold move against a powerful advertising industry to reduce the visual impact of billboards and junk yards along the highway.
