

# GIS USERS OF NORTHERN OHIO

The **GIS USERS OF NORTHERN OHIO** (GUONO) is an informal group that promotes geographic data sharing, encourages data standardization, and provides a network for the exchange of technical information between all GIS users. Our goals include developing a forum for open discussion of GIS issues and encouraging personal communication between GIS users of all skill levels in the public, private, non-profit and educational sectors.

**Mark your calendar and join us:**

**Tuesday December 14, 2010 from 1:30 to 3:00 at the Cleveland Metroparks' Canalway Center**

Staff from the City of Dublin will present their latest web mapping efforts including Dubscovery ("kitchen sink web GIS" ) and a variety of our Maplications (focused applications). They will not only show how the applications work, but they will also discuss some of the design and usage considerations as well as basemap and map service creation strategies. If time allows, they will also discuss their roles in Dublin's Cityworks implementation and usage.

Directions can also be found on our website.

We hope to see you at this event!

Best regards,

Dick Kotapish, GISP  
GIS Director  
Lake County GIS Department  
105 Main Street
