

HAITI Earthquakes

12/01/2010 09:53:09 PM UTC

GDACS Situation Report

On 12/01/2010 09:53:10 PM UTC an earthquake of magnitude 7.0 and depth 10km has struck an very highly populated area in the Ouest Province (population: 2.2 million) in Haiti. GDACS estimates the likelihood for need of international humanitarian intervention to be high (Red alert).

GLIDE No. EQ-2010-000009-HTI

Map Information

The map overlays the 12 January 2010 earthquake in Haiti with data on built-up area, derived from Quickbird data using the JRC PANTEX algorithm. Colours represent earthquake intensity zones (Modified Mercalli Index)

All the data belong to the Digital Map Archive repository (www.dma.jrc.it)
Spatial Reference: GCS- WGS 1984
Map Scale: 1:50 000
Time Reference: 12th of January 2010
Background Data: Digital Map Archive

A joint initiative of the United Nations and the European Commission

The Global Disaster Alert and Coordination System provides near real-time alerts about natural disasters around the world and tools to facilitate response coordination, including media monitoring, map catalogues and Virtual On-Site Operations Coordination Centre.
