

# Jail Population Statistics

For the year 2016 the facility booked in a total of **5372** inmates. The yearly inmate population average showed an overall increase with the average daily population for 2016 increasing to an annual average of 374.11 inmates, giving 2016 the second highest average jail inmate population for the history of the facility. The daily inmate population average was the highest in 2013 when the facility reached an annual average of 383.34. In addition, the Lake County Inmate Population showed an increase from 2015 to 2016. In 2015, the Lake County Inmate Population was an average of 316.96 for the year. In 2016 the Lake County Daily Average Inmate Population increased to an annual average of 364.40 inmates. This was an overall increase of 14% for Lake County Inmates in 2016.

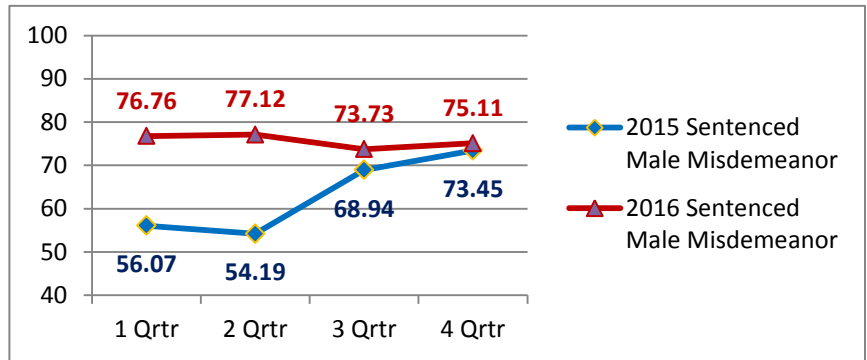

For 2016 the overall inmate population was higher than 2015. The monthly population trends were unique in that the population increased for the first 5 months of the year with two of the highest monthly averages. The largest decline was from October to December when the population dropped 43.66 inmates. The lowest 2015 monthly average inmate population was in December with an average inmate population of 335.44. The highest 2016 monthly average inmate population was in May with an average inmate population of 402.45.

There are eight categories of the inmate population that are broken down in this section. First section will cover the male-female / sentenced and un-sentenced Misdemeanor inmates. For all of the Misdemeanor and Felony categories that are tracked, the 2015 quarterly inmate population averages started below the 2014 first quarterly inmate population averages.

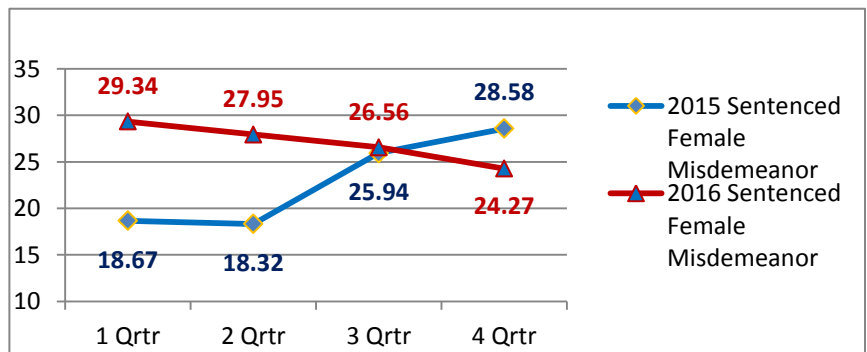

### Sentenced Male Misdemeanor

The general trend for 2016 was stable over the year. In 2016 we averaged from 76.76 to 73.73 in this area of the inmate population. The biggest decrease was from the second to third quarter of 2016. For the year, 2016 had an 18.6% overall increase in this category of the inmate population from 2015.

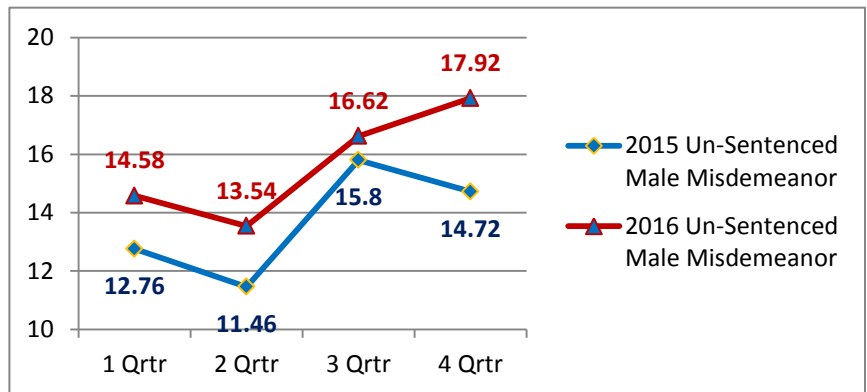

### Sentenced Female Misdemeanor

In 2016 the count for Sentenced Female Misdemeanor inmates in the first quarter was 29.34. This area of the inmate population showed decreases in each quarter dropping to 24.27 in December. For the year, 2016 still had a 17.6% increase for this category of the inmate population over 2015.

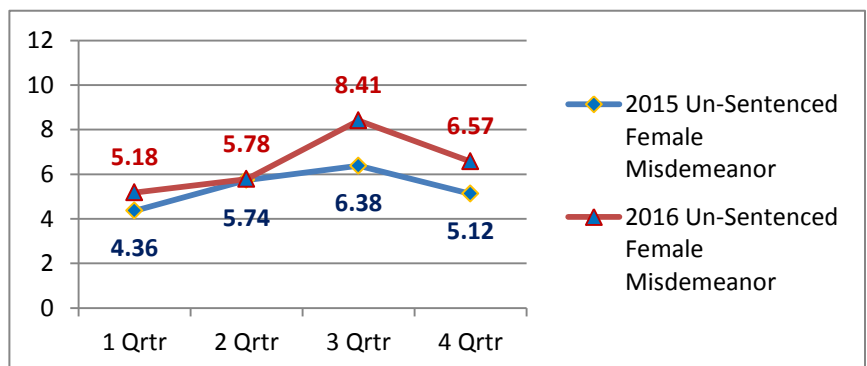

### Un-Sentenced Male Misdemeanor

In 2016 the trend for this category of the inmate population mirrored the trend for of the first 3 quarters of 2015. There was a decrease from the first to the second quarter and then an increase for last two quarters of the year. For the year, 2016 had a 12.0% increase in this category of the inmate population over 2015.

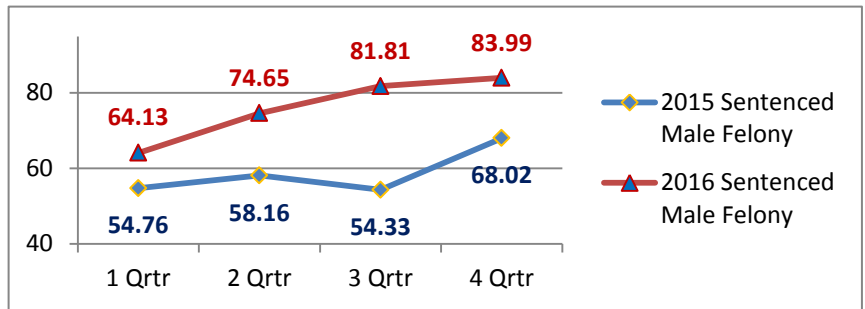

### Un-Sentenced Female Misdemeanor

In 2016 the trend for this category of the inmate population was very similar to 2015. There were increases from the first to the third quarter and then a decline for the fourth quarter. For the year, 2016 had a 19.1% increase in this category of the inmate population over 2015.

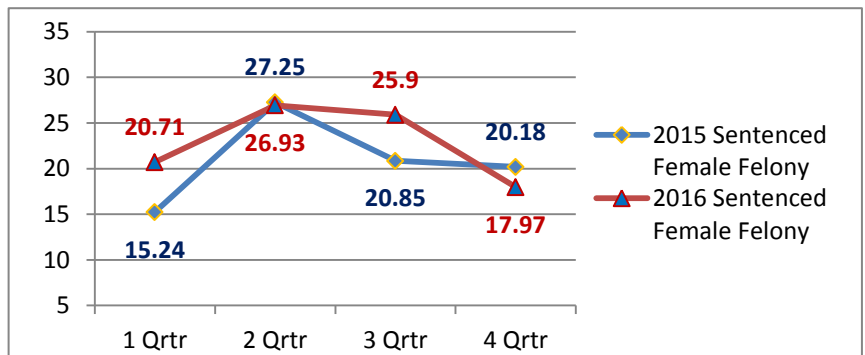

### Sentenced Male Felony

For 2016, the trend was a steady increase through the year. Starting with 64.13 for the first quarter and ending with 83.99 for the 4<sup>th</sup> quarter. For the year, 2016 had a 26.8% overall increase in this category of the inmate population over 2015.

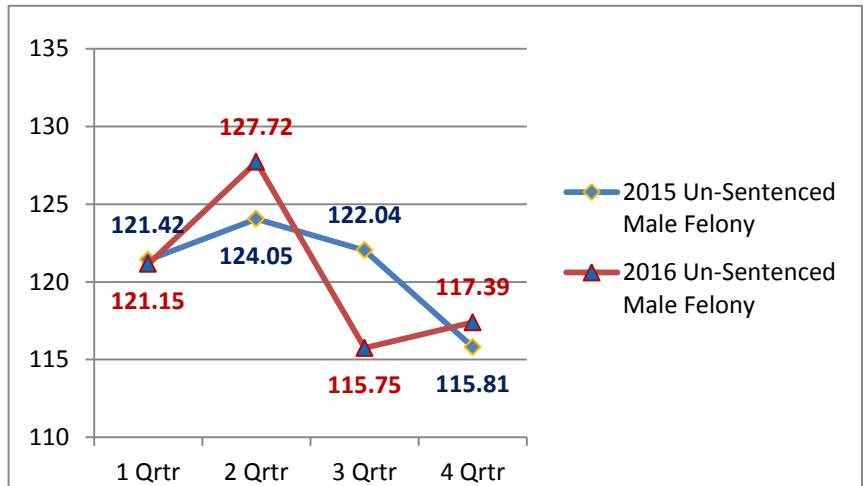

### Sentenced Female Felony

For 2016, there was a marked increase from the first quarter going from 20.71 up to 26.93 in the second quarter. There was drop in the third quarter down to 25.9 and then down to 17.97 in the fourth quarter. For the year, 2016 had the smallest increase of 9.13% in this category of the inmate population over 2015.

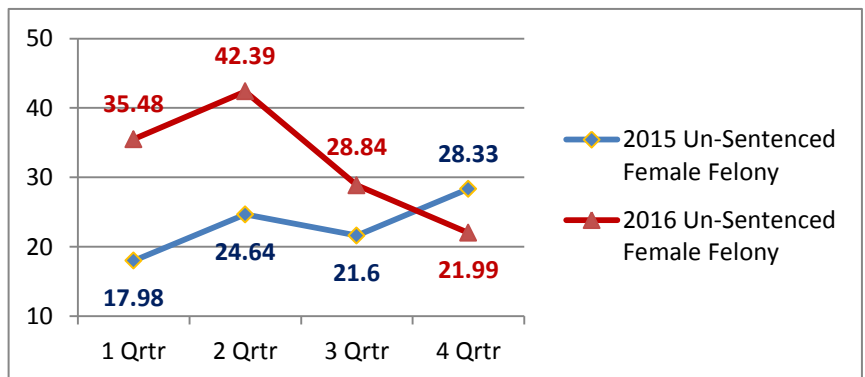

### Un-Sentenced Male Felony

For 2016 the first quarter was an average of 121.15, almost matching the first quarter of 2015 which was 121.42. The counts increased from the first quarter to second quarter being 127.72. There was a marked decline from second quarter to third quarter, dropping to 115.75. Slight increase at 117.39 in the fourth quarter. For 2016, this category had the only decrease of only -.07% overall drop in this category of the inmate population compared to 2015.

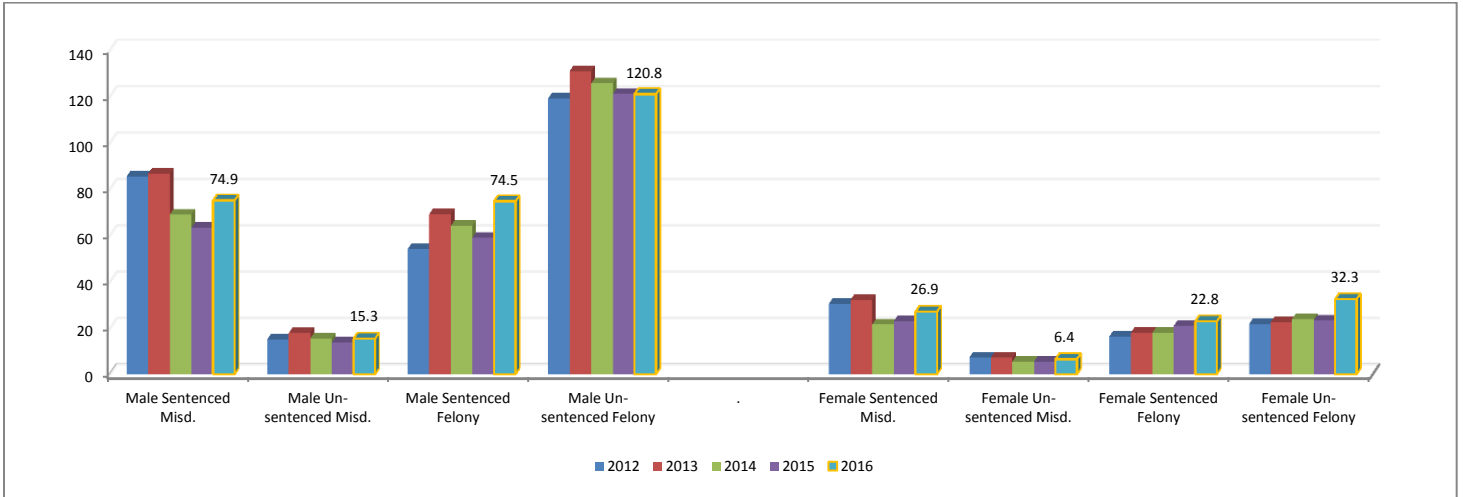

### Un-Sentenced Female Felony

In 2016 the first quarter of 35.48 started well above the 17.98 of 2015. There was an increase to 42.39 in the second quarter then a decline to 28.84 in the third quarter then down to 21.99 in fourth quarter. For the year, 2016 had an increase of 39.7% in this category of the inmate population over 2015.

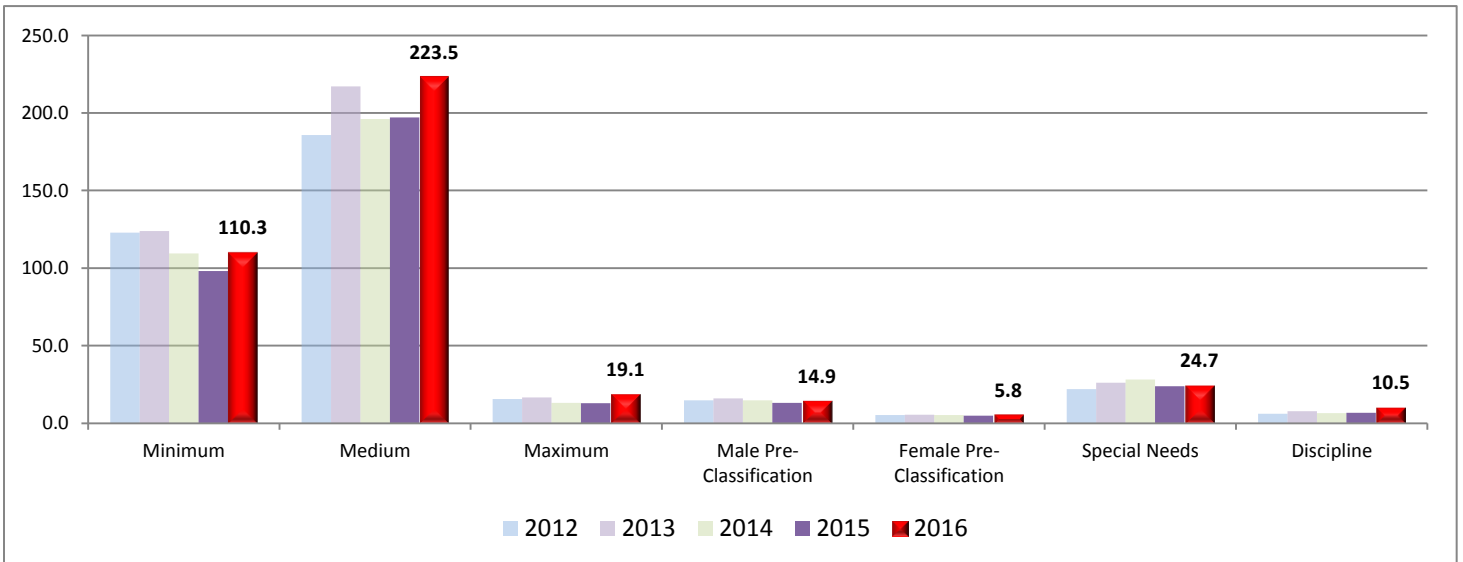

In 7 of the eight categories, the 2016 averages showed marked increases over the 2015 averages. The 2016 Un-Sentenced Male Felony category was the only category to show a very small decrease in 2016 compared to the averages of 2015.

In 2016 the male un-sentenced Felony category showed the only decrease of .07. The category showing the highest increase was the Male Sentenced Felony category with a 15.72 increase. All the Female Sentenced and Un-sentenced categories showed increases over 2015. From 2015 to 2016 the number of Misdemeanor inmates increased by 17.58%, a total of 18.48 inmates. The number of Felony inmates increased 11.96%, a total of 26.74 inmates.

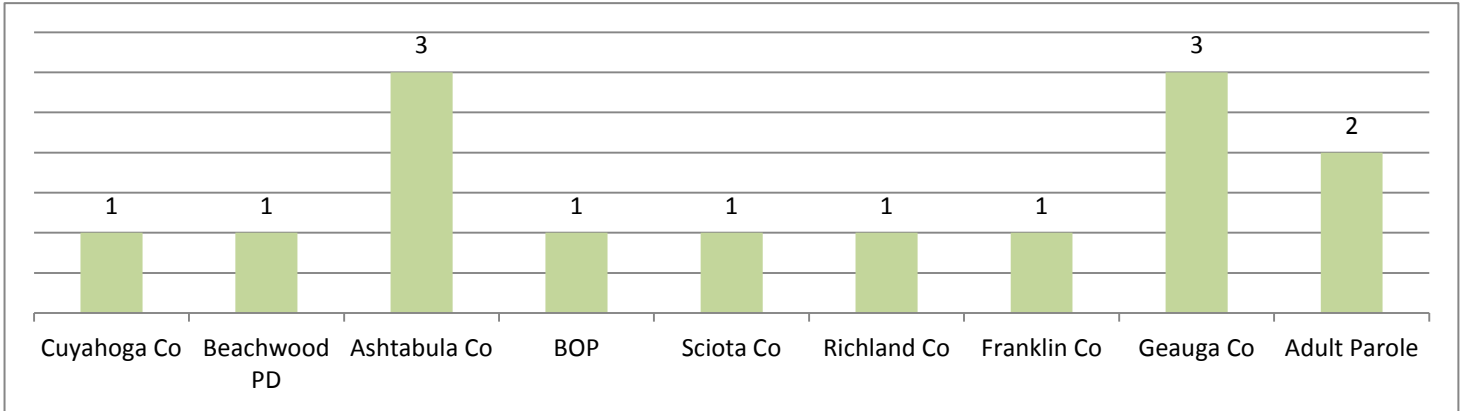

In 2016, the security level daily average populations changed in relation to the overall population changes. Minimum security levels showed an increase from 98.1 in 2015 up to 110.3 in 2016. The Medium Security levels had the largest increase from a daily average of 197.1 in 2015 up to 223.5 in 2016. To date, 2016 recorded the highest Medium security average population for the facility. The Maximum Security level inmates had an increase going from a daily average of 13.0 in 2015 up to 19.1 in 2016. There was an increase in the special needs inmate population in 2016, from 23.9 in 2015 up to 24.7 in 2016. The inmates housed in disciplinary status rose from 6.7 in 2015 to 10.5 in 2016. The year 2016 found our facility housing two juvenile inmates during the year.

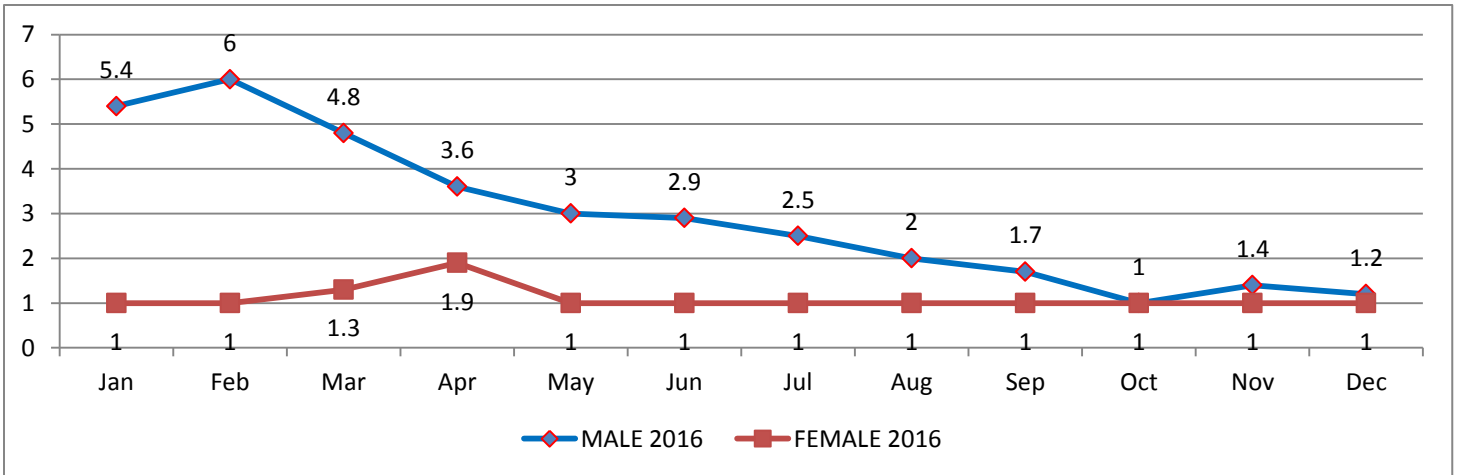

## Inmate Billing and Out of County Inmates

For 2016 the facility had 14 out of county billable inmates for the year. That is an increase from the average of 8.00 out of county inmates in 2015. There were nine agencies or departments outside of Lake County that were billed for housing inmates in our facility in 2016, breakdown is below.

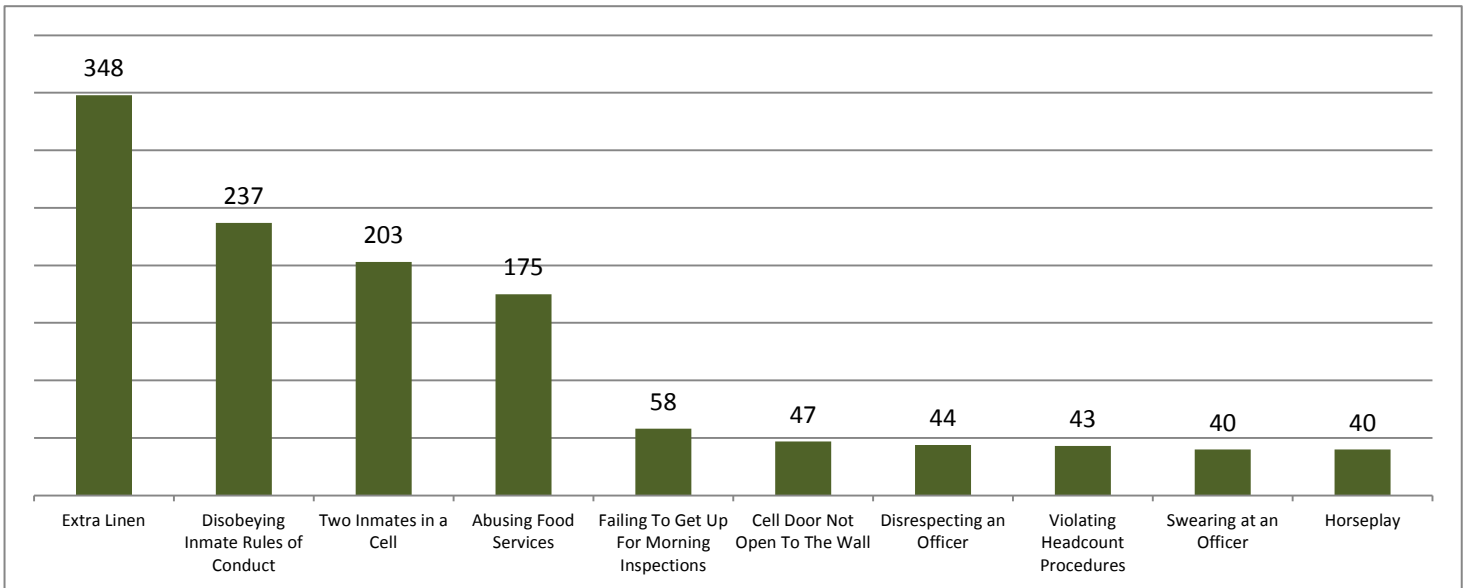

In 2016 the Male U. S. Marshal population decreased throughout the year with a high of 6 in February to a low of 1 in October. The Female U. S. Marshal population was stable through the year averaging only 1 for the year.

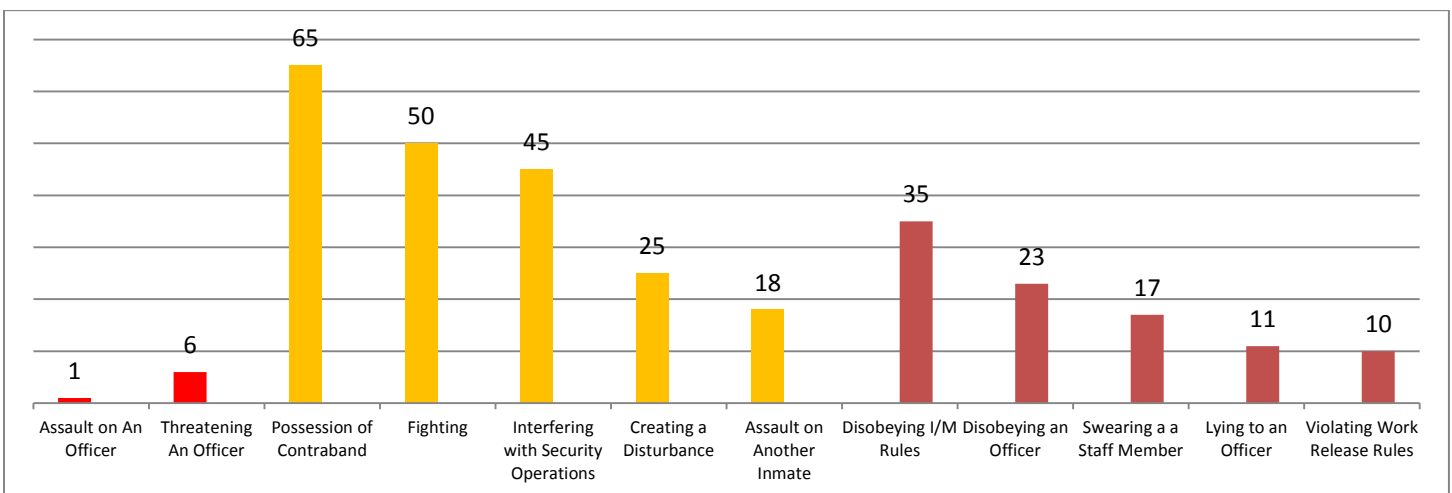

## Inmate Discipline

In 2016 for the area of inmate discipline there was a decrease in the inmates being locked down for 24 hours for minor rule violations. There were 1546 lock downs in 2015 compared to 1458 lock downs in 2016; it decreased to a total of 88 - 24 hour lock downs in 2016 from the previous year. The number of 24 hour lock downs decreased approximately 6%. The four most violate rules for 24 hour lock downs were: 1] Extra Linen, 2] Disobeying Inmate Rules of Conduct, 3] Two inmates in a cell, 4] Abusing food services. The ten most violated rules that resulted in 24 hour lock downs are:

Jail incidents showed an increase from 240 incidents in 2015 up to 268 in 2016. There were 198 incidents involving male inmates and 70 incidents involving female inmates. There was 1 documented incident that was identified as Assault on Officer and 6 Threats made on Officers or staff members for 2016. Inmates charged with Possession of Contraband rule violations doubled going from 40 in 2015 up to 65 in 2016. Most contraband items found were medications, cigarettes and tobacco products, notes and medications.

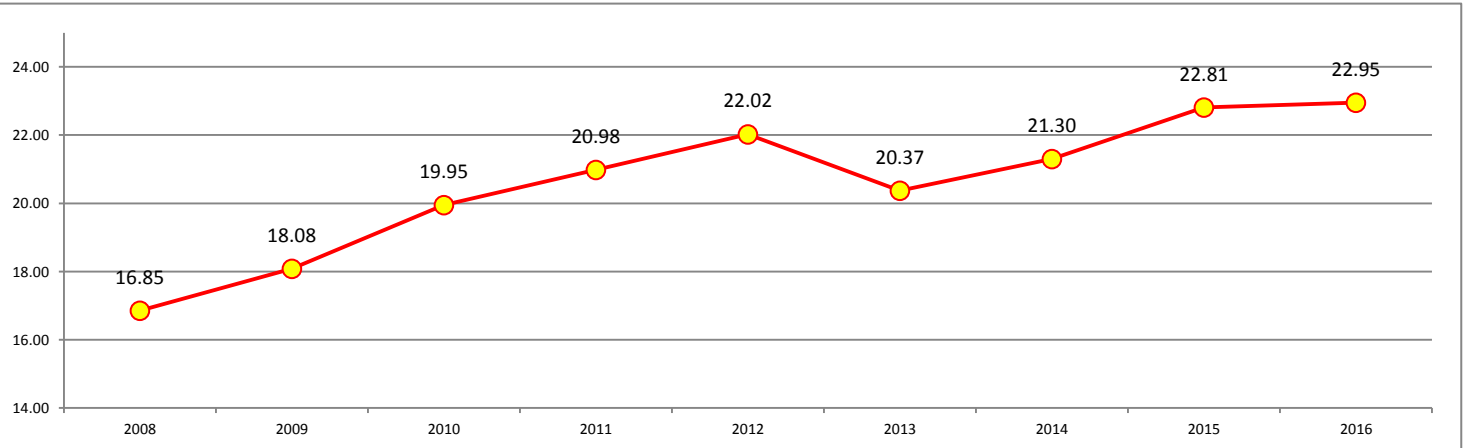

## Miscellaneous Jail Statistics

There were two inmate deaths of drug over doses in the Adult Detention Facility for 2015. We had one instance where an inmate had overdosed on heroin and naloxone was used to counter the overdose, that inmate was subsequently transported to the hospital and survived the overdose. There were no completed suicides in the facility in 2015. There were 3 serious suicide attempts in 2015 that were averted by the staff during the completion of their daily duties. There were no weddings documented in 2015. There were 3 instances where inmates who had been taken out of the facility for furloughs or did not return from work release. There were 7 male inmates who were pulled from the work release PFS program for discipline reasons in 2015. There was one female inmate removed from the program due to discipline reasons.

## Tracked Changes in Jail Population

In looking at the inmate population, there are several areas that have contributed to the changes in the overall inmate population. One of the areas that have contributed to this rise in inmate population is the length of stay for an inmate. From 2008 through 2012, the average length of stay for Lake County inmates rose from 16.85 days up to an average of 22.04 days for 2012. In 2013 that trend decreased down to 20.37 day average. In 2014 the length of stay increased to 21.30. In 2015 there was an increase with the yearly average length of stay was 22.81. In 2016 the facility saw the highest yearly average length of stay for inmates 22.95 in reference to sentenced inmates.

These days are based on the actual number of days an inmate stays in this facility from the day they are booked through the day of their release. Adding to this factor is the overall increase in the number of inmates we house each day. Because of these two factors to the inmate population changes, the facility has seen an inmate population that has increased and those inmates are staying on average 6.1 days longer in 2016 as compared to 2008 average length of stay.
